

Ahmed Sghaier

Senior Full-Stack Engineer — React · Node.js · TypeScript · Enterprise Applications · Data & AI

a7mado008@gmail.com | github.com/A7med-Sghaier | Bavaria, Germany

I design and deliver enterprise web applications across frontend, backend, data and architecture — turning complex operational requirements into reliable products with measurable impact.

EXPERIENCE

Senior Full-Stack Engineer — bulwiengesa gmbh

Jan 2021 — Present

End-to-end development of the RIWIS real-estate data and analytics system — full-stack feature delivery across frontend, backend, APIs, PostgreSQL and production support.

- Built a real-time price-prediction API using Python and machine-learning models, replacing a monthly database-driven price pipeline.
- Prevented continued growth of database tables already exceeding 50 GB.
- Digitized the Dev-Monitor from an annual printed publication into an online and downloadable product.
- Redesigned the object-view experience, reducing loading time from ~2.5s to ~700ms.
- Implemented and maintained CI/CD workflows.
- Collaborated with product management, analysts and data-science stakeholders.

IT Solution Designer / Software Developer — LBBW

Oct 2019 — Dec 2020

Developed and maintained a production Calypso banking system — implementing business and regulatory change with a focus on stability and observability.

- Implemented business and regulatory changes; created scheduling tasks and workflow rules.
- Developed automated PDF confirmation and report-generation processes.
- Integrated Elasticsearch and ELK for centralized technical and operational monitoring.
- Optimized PDF report generation and reduced processing time.
- Handled bug fixing and production-stability improvements.

Master Thesis / Data Scientist — Predictive Failure Detection — BMW Group

Feb 2019 — Sep 2019

Developed a predictive failure-detection solution for industrial test benches using event logs and sensor data.

- Analyzed event logs and sensor data; identified root causes across incomplete, heterogeneous and unstructured sources.
- Built an initial ML model for failure detection and future-failure prediction.
- Built supporting dashboard components using Angular.

Full-Stack Developer / ML Software Developer — Glanos GmbH

Aug 2017 — Feb 2019

Developed data-driven web applications and text-analysis features; built frontend and backend modules for DataSphere.

- Worked on Named Entity Recognition and matching functionality.
- Integrated machine-learning capabilities into application workflows.

Frontend Web Developer — LMU — Chair of Data Science

Oct 2017 — Feb 2018

Software Developer — Elunic Software Engineering GmbH

Mar 2016 — Aug 2017

Software Developer — SEMCO Software Engineering GmbH

Jun 2015 — Feb 2016

PHP Developer — Cayero Internet GmbH

Feb 2015 — May 2015

EDUCATION

M.Sc. — Computer Science — Ludwig-Maximilians-Universität München

Apr 2016 — Sep 2019

B.Sc. — Computer Science — University of Carthage, Tunisia

Sep 2009 — Jun 2012

BTP — Computer Maintenance — Private School of Computer Science, Tunisia

Jul 2013 — Feb 2014

German Language Studies — DKFA Munich

Apr 2014 — Jun 2015

EXPERTISE

Frontend Architecture

React, Angular, TypeScript, JavaScript, Tailwind CSS, SCSS, Vite, Storybook, Component architecture

Mobile Development

Swift, SwiftUI, Kotlin, Jetpack Compose, iOS, Android, Mobile architecture, REST integration

Backend Systems

Node.js, NestJS, Express, Java, Spring Boot, Python, REST APIs, Knex.js, Falcon, Strapi

Databases & Data

PostgreSQL, SQL, MySQL, MongoDB, Oracle, SQL Server, NoSQL, Data modeling

Enterprise Systems

Calypso, Production monitoring, Reporting workflows, Scheduling, PDF generation

Data & AI

Machine Learning, Predictive Analytics, Data Mining, Event-Log Analysis, Deep Learning, Text Analytics, Named Entity Recognition, Elasticsearch, ELK

Delivery & DevOps

Docker, Docker Compose, GitHub Actions, GitLab CI/CD, Jenkins, Linux, pnpm, Yarn, Biome, Testing

AI-Assisted Engineering

Claude Code, OpenAI Codex, AI-assisted architecture analysis, AI-assisted review, AI-supported documentation & testing
